SUMMARY

Back End Developer with 5+ years of full-stack experience designing, enhancing and maintaining PHP web applications.
My passion lies in learning about the latest technologies.
I love PHP and JavaScript and am always learning more about them.

EXPERIENCE

Back-end Developer
07/2020 - Present
Jihaat

It was the first time in Jihaat that I experienced working in a professional team. Jihaat is working in the field of advertising and branding for businesses. My job was to design and create the API for the Front-End team.

- Create RESTful APIs
- I became familiar with the Scrum framework
- Creating b2b shopping websites in the field of construction, medicine and common daily products
- I became familiar with solid principles
- Deepening in the git version control
- Get started with Node.js frameworks like NestJs

Junior Back-end Developer
02/2020 - 06/2020
Freelancer

I think every successful programmer has been a freelancer for a period of their career. I also decided to work as a freelancer for a while to have more useful time to learn and more power in choice.

- Deepening in the Laravel framework
- Learn about design patterns and clean code
- Familiarity with CI / CD tools

Junior Full-Stack Developer
10/2017 - 01/2020
Mahbaan

Mahbaan startup operated in the field of insurance training and sales.

- Redeveloped the company website using CodeIgniter, jQuery, material-bootstrap
- Create user management panels using Laravel or CodeIgniter and simple front-end libraries such as jQuery, Material-bootstrap
- Create smart sites to calculate insurance prices using formulas and sort insurance companies by price, popularity, offices and distance.

EDUCATION

Software Engineering
2020
Bahonar University Of Shiraz - Associate of Engineering

Software Engineering
2018
Apadana Institute Of Higher Education - Associate of Engineering
